# How to Move Item in Deposco

1 Grab a handheld and make sure when you login that you are in "production"
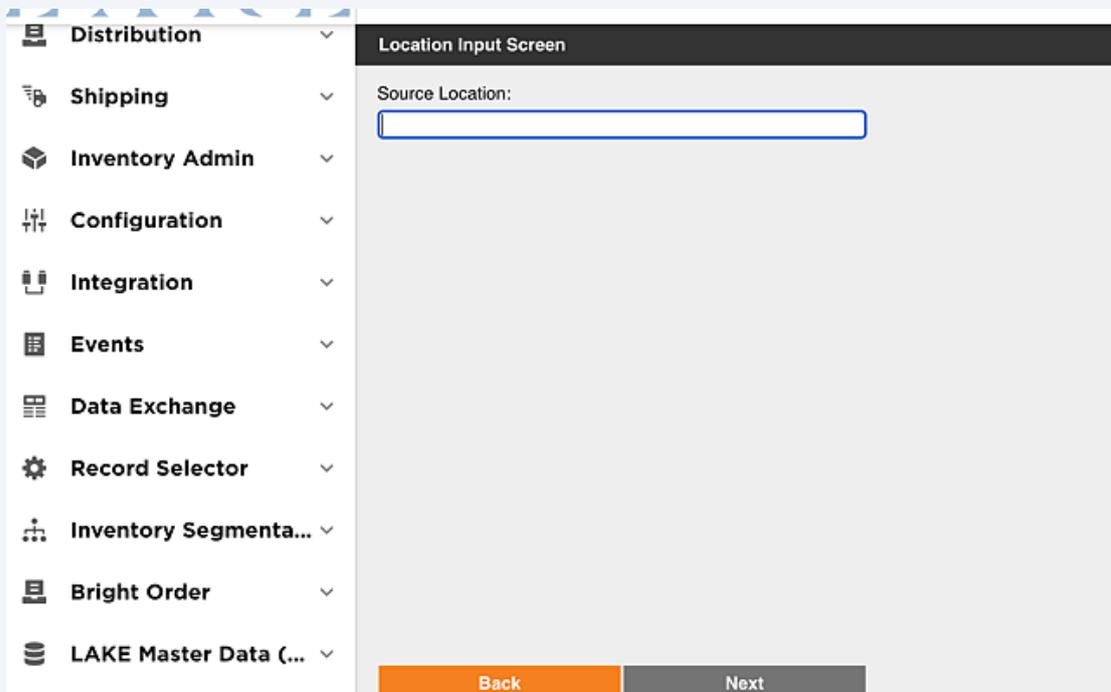

**2** Click "LAKE Store"

3   Click "Move Item"

4   You will be brought to the Location Input Screen. You will enter in or scan the location you are wanting to move the item from and select "Next"
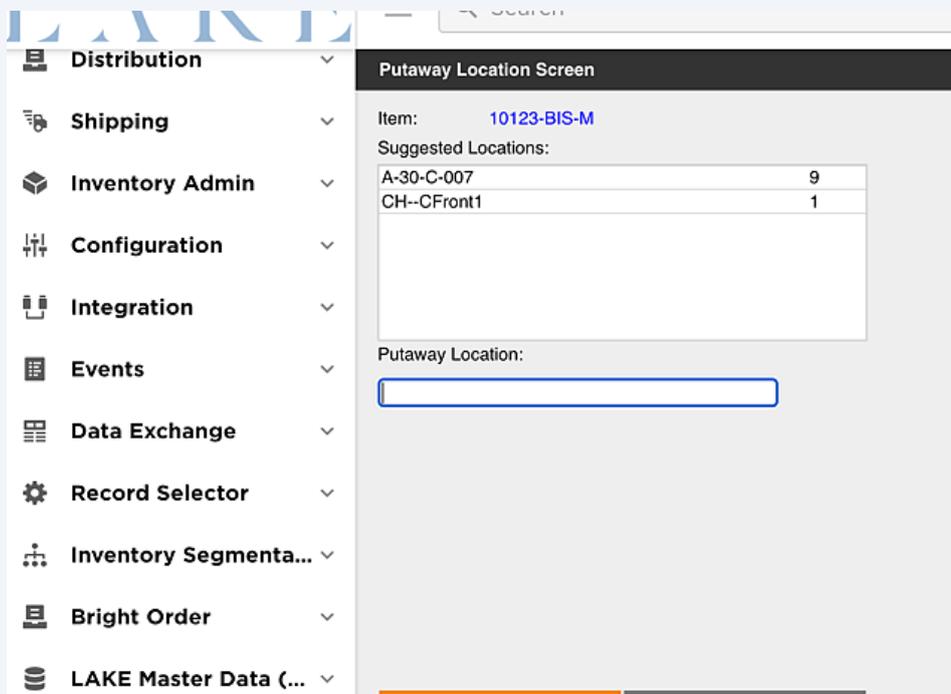

5 After entering in the location, you will see the list of items in that location. You will then type or scan the sku of the item and select "Submit"

6 You will now be on the Putaway Location Screen. You will type or scan the location you are moving the item to and select "Submit"

7 Once moved, you will be brought back to the Move Item Screen where you will see that your item has been moved successfully
